PROFESSIONAL PROFILE

Senior QA Automation Engineer with **10+ years in software quality assurance**, including more than three years leading QA teams at Cambio Software Engineering. Currently building and maintaining **end-to-end UI and API automation frameworks in Playwright and TypeScript** for a Netherlands-based company, with BDD (Cucumber), multi-environment Jenkins pipelines, Docker execution and Jira traceability. Combines hands-on framework engineering with test strategy, release quality ownership and mentoring. ISTQB certified (CTFL, Agile Tester) with a Master of Information Systems from SLIIT.

10+ years Software quality assurance	3+ years Leading QA teams	Playwright + TS UI, API & mobile web	ISTQB CTFL & Agile Tester

TECHNICAL SKILLS

Test Automation	Languages & Tooling	CI/CD & QA Practice
- Playwright (UI, API, mobile web) - Cucumber / Gherkin (BDD) - Selenium WebDriver - Page Object Model & fixtures - Cross-browser testing	- TypeScript, JavaScript, Node.js - API testing: Axios, JSONPath - Test data: Faker, MailSlurp - ESLint, Prettier, Husky - Git & pull-request workflows	- Jenkins multi-environment pipelines - Docker test execution - Jira & test traceability - Test strategy, planning & estimation - Agile / Scrum, team leadership

PROFESSIONAL EXPERIENCE

Senior Quality Assurance Automation Engineer Dual Inventive · Netherlands · Remote	Jan 2025 – Present
- Design, build and maintain end-to-end test automation frameworks in Playwright and TypeScript covering web applications, a mobile web app and backend services. - Developed BDD UI test suites with Cucumber/Gherkin and API test suites using Playwright request contexts, Axios and JSONPath response validation. - Run automated suites through Jenkins pipelines for test, acceptance and production environments, including cross-browser runs and Dockerised execution. - Automated email-driven user journeys with MailSlurp and generated realistic test data with Faker to keep tests independent and repeatable. - Synchronise automated results with Jira for requirement-to-test traceability, attaching evidence such as screenshots. - Maintain production verification suites run after releases to confirm critical flows stay healthy. - Raised test code quality with ESLint, Prettier, Husky pre-commit hooks and pull-request templates.	
Cambio Software Engineering · Colombo, Sri Lanka · Oct 2017 – Dec 2024 (7 years)	
Software Quality Assurance Lead	Aug 2022 – Dec 2024
- Led the QA team: defined test strategy and test plans, estimated testing effort and allocated work across sprints. - Owned release quality and sign-off, running defect triage with development and product teams. - Drove test automation adoption and expanded regression coverage to shorten release cycles. - Coached and mentored QA engineers, reviewing test design and automation code.	
Associate Quality Assurance Lead	Aug 2021 – Aug 2022
- Coordinated testing activities across Agile teams, reviewed test cases and reported quality status to stakeholders. - Supported team leadership while continuing hands-on functional and automated testing.	
Senior Quality Assurance Engineer	Aug 2019 – Jul 2021
- Designed and executed functional, integration and regression tests; built and maintained automated test scripts. - Guided junior engineers and contributed to Scrum ceremonies, estimation and defect management in Jira.	
Quality Assurance Engineer	Oct 2017 – Aug 2019
Analysed requirements, wrote and executed test cases, and logged and tracked defects through to resolution.	

Associate Quality Assurance Engineer

Nov 2016 – Oct 2017

Synapsys (DFCC Group IT) · Nawala, Sri Lanka

- Took part in all software QA processes, including testing of mobile applications.
- Initiated, managed and executed test cases to give clear quality feedback to project management.

Software QA Intern

Nov 2015 – Nov 2016

Virtusa · Sri Lanka

- Executed test cases on live projects and automated tests with **Selenium WebDriver** using Eclipse and IntelliJ.
